

TECNIJUSTA
Moulds for Plastics

Company
Overview

MORE THAN A MOULDMAKER

OUR COMPANY

Founded in 2006, Tecnijusta is specialized in production of technical injection moulds of high complexity for the different industry sectors.

Located in one of the biggest clusters of the European toolmaking industry (Marinha Grande), Tecnijusta presents itself in the market with a proactive stance in order to provide a set of services that includes the design, production, after-sales and repair of moulds.

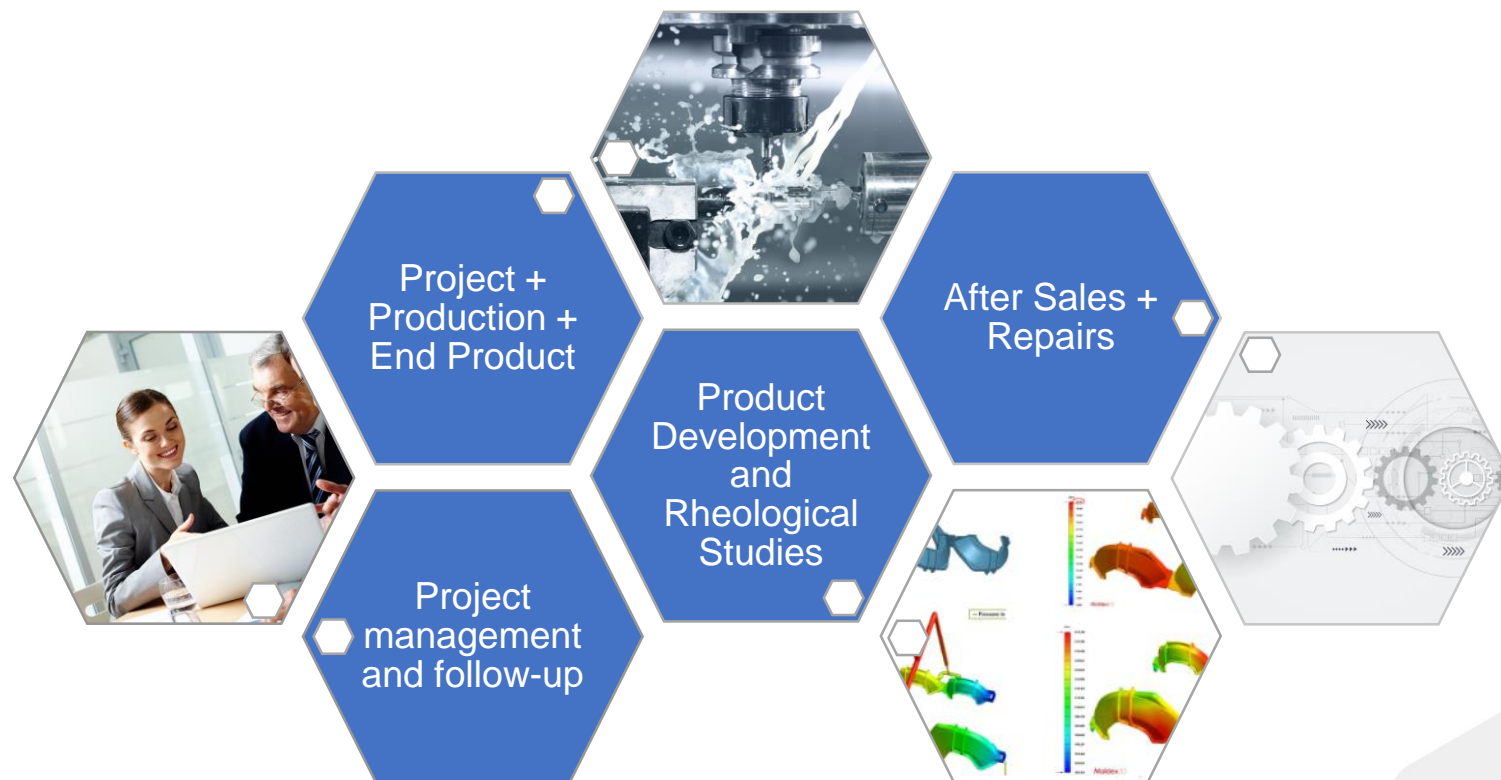

With a highly qualified and dynamic team, Tecnijusta faces each new project as a challenge.

Project in progress – New facilities

OUR SERVICES

We produce moulds up to 10T for the different industries, using the most demanding technologies always in accordance with customer's specifications
